DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a method for concentrating *Morinda citrifolia*, classified in class 23, subclass 306 for example .
- II. Claims 9-16, drawn to a method for freeze concentrating *Morinda citrifolia*, classified in class 424, subclass 725 for example.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions employ different method steps which lead to a different product. Each method could be performed alone without performing another method. For example, the method steps of Group II include 'freezing the most dilute components' and 'extracting said components by sifting'. These steps are not found in the Group I invention, and are thus patentably distinct processes.

Art Unit: 1654

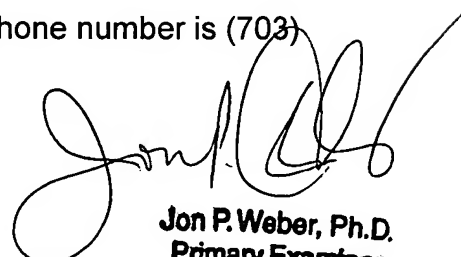

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
